Max. capacity (kg)	5
Height adjustment (mm)	735-1550
Tilt angle adjustment (°)	-80/90
Quick Release Plate	QR11
Net weight (kg)	3.4

### PRODUCT DESCRIPTION

Benro KH-25 is a camera tripod with an adjustable height from 73.5 to 155 centimeters. The tripod is equipped with a QR11 plate with a 1/4" screw, which makes mounting the camera to a tripod head simple and quick. The maximum allowed weight of the camera is equal to 5 kilograms.

Tripod KH-25 has legs with a twist-lock system, which ensures quick adjustment of the appropriate height. Rubber feet guarantee full image stabilization on a stable surface, while in the case of filming outside it is possible to unscrew the rubber elements and mount solid spikes into the ground.

The construction allows 360-degree rotation around the Y-axis (panorama) and camera tilt in the range of -80 to 90°. Separate pan and tilt locks allow the device to stabilize at the selected point. An additional advantage is the built-in spirit level.

We encourage you to check the availability of Benro KH-25 tripod at SQM Rental House!
