PRODUCT DESCRIPTION

The NEC MultiSync V652 is a 65-inch industrial touch monitor from Series V that supports 1920x1080 Full HD resolution. The technology allows you to operate 32 points of simultaneous, versatile touch - the monitor can be operated by fingers, gloves, stylus, or control gestures. The touch has a fast response time and usability thanks to four built-in optical cameras.

The V652 has a high-quality surface made of tempered glass with a double anti-reflective coating. The device offers an image brightness of 450 nits with the AMVA3's panel technology wide viewing angle and vivid, natural colors. The monitor contains one HDMI 1.3, DVI-D and DisplayPort input, and the available OPS slot that allows for easy connection with slot-in type computers.

NEC V652 is great as a digital signage screen in commerce or in conference rooms. The monitor has four VESA-compliant mounting holes (400x400mm), which makes it easy to mount the device on the wall. It is worth mentioning that the weight of the monitor (68.3kg) requires strengthening of the mounting surface.
