

PRODUCT NAME

NETGEAR WN300RP

DESCRIPTION

The WN300RP is a NETGEAR WiFi signal amplifier that increases the area of operation of a WiFi network in hard to reach areas by connecting to a router - installation and configuration are simple. According to the manufacturer's specifications, the maximum wireless transmission speed is 300Mbps.

NETGEAR WN300RP is equipped with a built-in power supply, and the design allows direct supply of power from the mains. The device has two external antennas, and operation is possible at a frequency of 2.4GHz. The equipment supports WiFi IEEE 802.11b/g/n standards, as well as WPS.

Thanks to the RJ45 port, the WN300RP repeater can also be used as a wireless bridge for the connection of A/V devices. SQM Rental House encourages you to rent a NETGEAR WN300RP!

SPECIFICATIONS

Category	Extender
Frequency band (GHz)	2.4
Protocols	IEEE 802.11b/g/n
Width (mm)	55
Height (mm)	67
Depth (mm)	34
Connectors	1 x Ethernet (RJ45)
Net weight (kg)	0.11
