

PRODUCT NAME

EUROLITE DMX SPLIT 4X

DESCRIPTION

SQM Multimedia Support offers a four-fold Eurolite DMX splitter (Steinigke) that allows you to split one DMX input signal into four outputs.

The front panel of the splitter offers 4 output sections - in each of them there is a 5- and 3-pin DMX output, which gives a total of 8 connectors. Next to the outputs, there is a Link Out/Terminate switch that disconnects subsequent devices in the DMX chain.

The rear panel of Eurolite DMX Split 4X is equipped with two sections, where one three- and five-pin DMX input and output are placed.

Each input and output of the splitter is galvanically isolated, which ensures an accurate and amplified signal.

According to the manufacturer's specifications, the Eurolite DMX splitter consumes about 20W of power during regular operation. Weighing slightly over 3 kg device is adapted for mounting in a rack shelf (1U).

SPECIFICATIONS

Power supply	230V AC; 50Hz
Width (mm)	483
Height (mm)	44.45 (1U)
Depth (mm)	190
Connectors	5 x DMX (3-pin, Output)
Connectors	1 x DMX (3-pin, Input)
Connectors	5 x DMX (5-pin, Output)
Connectors	1 x DMX (5-pin, Input)
Net weight (kg)	3.1
