

PRODUCT NAME

TRUSS CIRCLE / QUADRO / 7000MM

DESCRIPTION

The truss system produced by ALUSTAGE includes QUADRO-type trusses, which form a circle with an outer diameter of 7000 mm and an inner diameter of 6420 mm.

Truss elements in the 290A system are made of 50x2 mm diameter pipes and 20x2 mm diameter laths. The truss is equipped with a connection socket SZ02.10.

The QUADRO wheel consists of four elements in the form of eight curved beams, which makes it an ideal solution for the construction of stage structures, stage platforms and exhibition stands during trade fairs.
