

PRODUCT NAME

27" APPLE IMAC 5K

DESCRIPTION

SQM Multimedia Support offers a fantastic 27-inch iMac, which is the successor to a traditional desktop computer in the form of a functional and aesthetic all-in-one device. iMac is equipped with a Retina display with an amazing 5K resolution (5120x2880), which ensures the presentation of the smallest details in the best and sharpest quality.

iMac has fantastic technical parameters - a quad-core 3.2GHz Intel Core i5 processor with Turbo Boost option, which allows you to increase the clock frequency to 3.6GHz, and up to 1 terabyte of HDD space. The graphics unit AMD Radeon Pro R9 M380 with 2GB of GDDR5 memory provides great performance when working, playing or playing multimedia.

Users have at their disposal two ultra-fast Thunderbolt 2 inputs that support Mini DisplayPort, HDMI, DVI, dual-link DVI or VGA outputs with the help of an additional adapter. In addition, iMac is equipped with a standard 3.5mm headphone jack, four USB 3.0 ports, and an SDXC memory card slot. The device's safety is ensured by the built-in Kensington slot, which allows the installation of a security cable.

iMac is of course fully compatible with iPhones, between which you can send any data, multimedia, or continue the work already started. The whole structure is very slim and does not take up a lot of space, making it ideally suited to any office environment.
