PRODUCT DESCRIPTION

Mini HD Media Box is a mini-version multimedia player, which allows you to watch movies, photos or listen to music directly from an external memory - pendrive, memory card or hard disk, and then play the content via HDMI/AV output on any TV or screen.

The player offers a wide range of supported video, audio, image, and subtitle file formats, including full HD videos, MKV, and Blu-ray DVD movies. It also has the function of video decoding via H.264, DivX or XviD codecs. It is also possible to set the playback at a specific time.

The multilingual soft and small size make the Mini HD Media Box very easy to use and transport.
