

PRODUCT NAME

CHAINMASTER D8PLUS (500KG)

DESCRIPTION

D8Plus is an electric chain hoist of the ChainMaster brand, whose lifting capacity reaches 500kg at a speed of about 4m per minute (at 50Hz).

The D8Plus is equipped with one chain fall, 0.8kW motor, two DC brakes and a chain with a length of 24 meters. The maximum lifting height is approx. 23.5m. The device operates at phase-to-phase voltage, at 50Hz network frequency and 400V effective power value. D8Plus belongs to the M3 mechanism group (ISO).

The D8Plus chain hoist features a precise chain guide, direct control (or via a 24V contactor), an efficient friction clutch that effectively protects against overload, and an elegant, textile chain bag.

The transport weight of the D8Plus electric chain hoist is 110 kilograms.

SPECIFICATIONS

Falls	1
Capacity (kg)	500
Speed (m/min; @50Hz)	4
Motor power (kW)	0.8
Chain length (m)	24
Load chain (mm×mm; EN-818-7)	7x22
Weight w/o chain (kg)	27
Weight with chain (kg)	60.5
Width (mm)	442
Set contains	Power cord
Set contains	2 x Shackle 3.25T
Set contains	2 x Steelflex sling 1T (2M)
Protection Level (IP)	IP54
Height (mm)	155
Depth (mm)	257
