

PRODUCT NAME

CANON EF 70-200mm f/2.8L IS II USM

DESCRIPTION

EF 70-200mm f/2.8L IS II USM is a professional telephoto zoom lens with a focal length of 70-200mm by Canon, which is characterized by its solid construction, four-stage image stabilizer and a large aperture of f/2.8. It is considered to be one of the best telephoto lenses with 70-200mm focal length and f/2.8 aperture on the market.

The lens guarantees fantastic sharpness of photos in the center of the frame, well-corrected chromatic aberration, and perfectly fast and accurate autofocus. The telephoto lens also boasts very good image stabilization and great quality photography on the edges of FF and APS-C matrices.

The equipment is very durable, significantly resistant to dust and water, and its elements are made of fluorite and UD glass. The SQM Multimedia Support rental highly recommends the Canon EF 70-200mm f/2.8L IS II USM telephoto lens.
