| Depth (mm)         | 6.9   |
| Net weight (kg)    | 0.677   |
| Set contains       | Power supply  |

## PRODUCT DESCRIPTION

The second-generation Space Gray Apple iPad Pro features a phenomenal 12.9-inch Retina screen, Multi-Touch display, 2732x2048 resolution and an extremely powerful battery (10891mAh). 64GB of device capacity allows for trouble-free storage of all necessary documents.

Compared to previous Apple tablets, the Retina screen parameters have been significantly enhanced by increasing the touch sensitivity, the brightness parameters and equipping with anti-reflective coating. The tablet also has a refresh rate of 120Hz, and the A10X Fusion six-core processor has no problems when handling the most demanding applications, or when rendering and editing movies in 4K resolution.

The iPad proposed by SQM Rental House is equipped with the Touch ID fingerprint reader, which will ensure both data protection and also provide a quick way to unlock the device. Four speakers are responsible for good sound quality, and two microphones for the transmission of clear voice messages.

The Space Gray tablet offers two cameras - the front with a resolution of 7Mpx and the rear 12Mpx. Both ensure great HDR photo quality, capture the smallest details and offer a full palette of vibrant colors in the photos. Work comfort is now much greater thanks to the Slide Over and Split View functions, which allow you to run several applications at the same time. The upgraded Dock keeps them ready every time.

The device has a Lightning connector for charging, a 3.5mm headphone jack and a Smart Connector that allows you to connect an additional full-size keyboard.

The compact size and lightweight of the Space Gray Apple iPad Pro 12.9" tablet make it possible to enjoy the device at any time and in any place.
