

PRODUCT NAME

MIPRO ACT-80T

DESCRIPTION

The Mipro ACT-80T is a multi-function digital bodypack transmitter, which is powered by two alkaline (AA) batteries.

The compact transmitter is equipped with an LCD panel that displays information about the channel, volume level, and battery status. Thanks to the buttons placed under the screen, the user can choose operating parameters. By using the ACT function you can quickly synchronize the frequencies of the transmitter and receiver.

ACT-80T gives the possibility of stepwise adjustment of microphone gain (6dB, from -12 to +18dB). Other advantages of the transmitter include the built-in limiter and low-pass filter.

The Mipro ACT-80T has an antenna and a XLR four-pin mini connector for connecting a microphone. The solidly finished metal housing makes the 81-gram transmitter very durable.

SPECIFICATIONS

Device type	Transmitter
Operating frequency (MHz)	540 ~ 604 (UHF, 5F)
Width (mm)	63
Height (mm)	70
Depth (mm)	25
Net weight (kg)	0.081
