

PRODUCT NAME

LG 32UD59-B

DESCRIPTION

32-inch LG 32UD59-B offers a phenomenal picture in Ultra HD 4K quality with a resolution of 3840x2160. A density of over eight million pixels guarantees a realistic experience in every RPG/FPS game, along with detail-rich graphics and fantastic textures.

Thanks to the factory color calibration, 32UD59-B guarantees very vivid colors by covering over 95% of the DCI-P3 color space, and AMD FreeSync technology effectively resists stuttering during image rendering, even during the most demanding gaming. In addition, thanks to the Black Stabilizer function, there is a possibility to notice the tiniest and darkest details, which is especially useful in FPS games.

The ArcLine ergonomic and slim design allows for a large adjustment of the tilt angle and the height of the screen - 32UD59-B will meet all the conditions of even the most demanding players.

The screen has two HDMI 2.0 ports, one DisplayPort connector, and a 3.5 mm headphone jack.

In addition to the standard mounting on the base, 32UD59-B can also be installed on a monitor bracket or wall - all thanks to the 100x100mm spacing of mounting holes in the VESA standard.

SQM Rental House encourages you to check the availability of LG 32UD59-B!

SPECIFICATIONS

Category	Monitor
Panel	VA
