

PRODUCT NAME

MSI GV72 7RD

DESCRIPTION

MSI GV72 7RD is a laptop with a 17.3-inch Full HD display, which is dedicated to players. GV72 is equipped with a reliable GeForce GTX 1050 graphics unit processing, which is based on the Pascal architecture. The fourth-generation Intel Core i5-7300HQ processor with four cores, frequency of 2.5GHz and 8GB of DDR4-2400 RAM are responsible for the perfect smoothness of equipment operation.

Thanks to the Matrix Display technology, the GV72 7RD offers multi-tasking support for additional two monitors - all you need to do is connect other devices via HDMI 1.4 or Mini-DisplayPort 1.2 to get outstanding 4K resolution. In addition to the great GPU and processor, the ultra-fast 128GB M.2 SSD drive and 1TB HDD capacity guarantee both the dynamics of the operating system and the right amount of space for applications and multimedia resources.

The Cooler Boost 4 cooling system used in GV72 consists of six heat pipes and two fans that perfectly dissipate heat from the inside of the device. Thanks to this, the laptop remains silent and properly cooled even during very demanding games.

Great hardware parameters are enhanced by an elegant, brushed housing and SteelSeries keyboard with red Silver Lining Printed backlight. The Nahimic 2+ audio system and Audio Boost technology that reduces noise and eliminates distortion ensure perfect sound quality.
