

PRODUCT NAME

EUROTRUSS FD34-020 (200MM)

DESCRIPTION

Eurotruss FD34-020 is a straight truss element that was custom-made exclusively for SQM Multimedia Support. The structure consists of main tubes 50x2mm and braces 20x2mm. The length of the element is 200mm, and the width and height are equal to 290mm.

Element FD34-020 is mainly used to connect longer truss elements with corner blocks. The structure is made of EN AW 6082 T6 hardened alloy (AlSiMgMn), which is known for its very good machinability, good anodizing susceptibility and also very high strength.

The Eurotruss FD34-020 design has been approved by the TÜV Rheinland unit and complies with DIN EN 1999-1-1 and DIN EN 1999-1-1/A2 norms.

SQM Rental House recommends FD34-020 construction.

SPECIFICATIONS

Element	Straight truss
Color	Black
Material	EN AW-6082 T6
Length (mm)	200
Main tube diameter (mm×mm)	50x2
Braces (mm×mm)	20x2
Connection	CS1-CON
Width (mm)	290
Net weight (kg)	1.2
Height (mm)	290
