3D HOLO FAN Z3 (65CM)

TECHNICAL DETAILS

Diode type	720 (4 x 180) x LED RGB0805 diode
Max. brightness (cd/m²)	400
Viewing angles (h/v; °)	170/170
Supported video formats	.mp4; .avi; .rmvb; .mkv
Supported image formats	.gif; .jpg; .png
Rotating speed (rpm)	650
Material	ABS; Aluminium
Working Environment	indoor
Max. power consumption (W)	36
Supply voltage	100-240V AC; 50/60Hz
Diameter (mm)	650
Depth (mm)	55
Net weight (kg)	0.75

PRODUCT DESCRIPTION

SQM Multimedia Solutions presents an innovative Z3 LED fan that creates amazing, 3D holograms and animations of very good quality.

The fan rotates on a circle with a diameter of 65 centimeters and has 4 arms. There are 180 RGB0805 LEDs on each arm, giving a total of 720 LEDs across the entire surface of the fan. The device must be connected to the power supply. It rotates at a speed of 650 rpm, creating at the same time eye-catching, three-dimensional holograms of great quality. According to the manufacturer's specifications, viewing angles reach as much as 176° vertically and horizontally, which guarantees excellent visibility from any position.

The LED fan is operated via an iOS/Android app through which you can manage the displayed holograms. The equipment supports video formats .mp4, .avi, .rmvb and .mkv. The user can also restore a moving image in the form of a .gif file or a .jpg and .png for a typical image file.

The ability to reproduce the company logo or any animation chosen makes the fan a fantastic option when organizing indoor promotional events or company events. Its small size and net weight of 0.75kg allows the device to effectively fit into any set design.
