

JBL TUNE 560BT

TECHNICAL DETAILS

Battery	Li-Ion 300mAh built-in battery (3.7V, lithium-ion)
Frequency response (Hz)	20 ~ 20000
Impedance (?)	32
Sensitivity	24dBV/Pa (1kHz)
Transducers	2 x 32mm
Connectors	MicroUSB port
Net weight (kg)	0.115

PRODUCT DESCRIPTION

SQM Multimedia Support offers JBL Tune 560BT wireless headphones, which have two dynamic drivers with a diameter of 32mm. Headphones reproduce sounds in the 20 to 20,000Hz frequency range.

The versatile black-color headphones offer wireless audio streaming via Bluetooth 4.1 (2.4GHz) as well as hands-free calls. Headphone control is facilitated by three function buttons located on the side and a Siri/Google Now assistant that responds to voice commands.

JBL Tune 560BT is powered by a built-in lithium-ion battery with a capacity of 300mAh, which allows about 16 hours of music playback with BT turned on (according to JBL specifications). Battery charging time does not exceed 2 hours, and the process itself is carried out through a MicroUSB connector.

An additional advantage of versatile headphones is the ability to fold the structure in several configurations. The device weighs 115 grams.
