PRODUCT DESCRIPTION

The C651Q is an NEC monitor that presents the image in native 4K resolution (3840x2160) on a 65-inch VA matrix screen. The maximum brightness of 400 nits, anti-glare coating and great viewing angles (178° horizontally and 178° vertically) allow you to notice every detail in phenomenal UHD quality - from any position and in any lighting.

The monitor has a very wide range of connectors with native UHD resolution and a refresh rate of 60 Hz, i.a. HDMI and DisplayPort. The C651Q also offers USB, RJ45 ports, a MicroSD card slot, and an OPS slot for slot-in type computers.

The device with a standard operating mode consumes about 200 watts of power, at maximum brightness this value rises to 255 watts, and the maximum possible consumption reaches 365W.

The C651Q is complemented by narrow (approx. 13mm), elegant bezels that will adapt to any interior design. Vesa mounts (600x400mm or 400x400mm) and the additional TileMatrix function allow you to hang the screen on the wall and adapt it to create an impressive video wall.

NEC C651Q is a fantastic choice when creating presentations in conference rooms, or for digital signage applications. The monitor can easily work 7 days a week, 24 hours a day. A long period of reliable operation and low maintenance costs ensure that the monitor can only bring profits.
