Net weight (kg)	0.057

PRODUCT DESCRIPTION

Logitech R400 is a wireless presentation remote that is equipped with a Plug & Play receiver - to start the presentation, simply connect the wireless receiver to the USB port.

The remote, which is available in the SQM Multimedia Support, requires two AAA batteries. The charge indicator on the top panel tells you whether you can continue the presentation without any problems. The R400 emits a 640~660nm red laser wave, which works as a clear and accurate indicator. The presenter connects wirelessly in the 2.4GHz band and operates in a 15-meter range.

The flawless design means that the R400 fits perfectly in the palm of your hand, and the buttons to control the presentation are perfectly under your fingers. The pen-sized device weighs less than 60g and has a slot for a USB receiver, making the R400 fully mobile that fits in your pocket.
