BROTHER HL-1110E

TECHNICAL DETAILS

Print technology	Laser
Printer type	Monochrome
Max. paper size	A4
Functions	Print
Print speed (pages/min)	20
Max. print resolution (dpi)	600x600 (2400x600 w/ Resolution Control)
Paper tray input	150
Paper tray output	50
Connectors	1 x USB-B
Width (mm)	340
Height (mm)	189
Depth (mm)	238
Net weight (kg)	4.5

PRODUCT DESCRIPTION

Brother HL-1110E is a small, electrophotographic laser printer, which is characterized by high printing speed (at 20 pages per minute) and a capacious paper tray (for 150 sheets).

The HL-1110E is a monochrome printer equipped with a starter toner that allows you to print a thousand pages. It allows for A4 size printing in 600x600dpi resolution (with extension to 2400x600dpi through resolution control), and also needs less than 10 seconds for initial printing in room-environment conditions. The HL-1110E will hold 50 sheets of paper in the output paper tray.

The printer is also characterized by its quiet operation during printing (approx. 51dB) and compact size that will allow you to set it anywhere in the office or on the desk. The printer has a USB 2.0 Type-B connector.

The HL-1110E uses approx. 380W of power during printing and about 40W in standby mode. The highest possible power consumption is about 1056 watts. The equipment works without any problems in temperatures between 10 and 32.5°C. SQM Rental House encourages you to rent a Brother HL-1110E printer!
