MSI GE60 2PG Apache is a gaming laptop with a 15.6" LCD panel and Full HD native resolution (1920x1080). The device is equipped with a dedicated NVIDIA GeForce GTX 850M graphics processing unit with 2GB of VD GDDR5 memory and a fourth-generation quad-core Intel Core i7-4710HQ processor with a base frequency of 2.5GHz.

Both great parameters of the processor and graphics card as well as 16GB of built-in RAM guarantee reliability and smoothness - even during the most dynamic gaming. Thanks to the flash memory on the SSD with a capacity of 128GB, the operating system is also much faster, and 1TB of capacity on the HDD will certainly be enough to store the resources you need.

Cooler Boost technology is responsible for the proper cooling of equipment, ensuring a decrease in temperature by up to 10% in a minute. The sound experience is effectively provided by the Dynaudio sound system, and the solid, backlit SteelSeries keyboard ensures the comfort of use. A very important aspect for demanding players is also the special Killer E2200 network system, which gives the possibility to manually prioritize games.

Available in SQM Rental House GE60 2PG Apache has an SD card reader, HDMI output and USB ports (both 3.0 and 2.0). The laptop also supports a maximum resolution of 3840x2160 and simultaneous operation on two additional screens.
