

JBL CONTROL ONE

TECHNICAL DETAILS

Speaker category	Bookshelf speaker
Speaker type	Passive
Max. SPL (dB; @1m)	114
Frequency range (Hz)	80 ~ 20000 (-10dB)
LF transducer	1 x 4"
HF transducer	1 x 0.5"
Nominal coverage (h/v; °)	N/A
Width (mm)	155
Height (mm)	228
Depth (mm)	139
Net weight (kg)	2.4

PRODUCT DESCRIPTION

JBL Control One is a set of passive two-way bookshelf speakers, which consists of two mini-monitors with a wall mounting system. The speaker is equipped with a 4-inch high-frequency transducer and a half-inch, titanium-laminated low-frequency driver. Both transducers are magnetically shielded.

The kit requires an amplifier with power in the range of 25- to 200 watts (with a recommended power of 100W). The Control One nominal impedance is equal to 8 ohms, and the range of reproducible frequencies is between 80Hz and 20kHz.

The compact JBL Control One loudspeakers do not require a lot of space, and their simplicity reduces configuration time. The speakers are available in the SQM Rental House rental in black color.
