

KINECT (XBOX 360)

TECHNICAL DETAILS

Field of view	57° horizontally
Field of view	43° vertically
Width (mm)	279
Height (mm)	76
Depth (mm)	76
Set contains	Power cord

PRODUCT DESCRIPTION

Kinect is a sensor designed for the XBOX 360 console that tracks and then reconstructs the movements and gestures of the player's body on the screen. The camera can record the presence of six persons, with the possibility of simultaneous play by two people.

The sensor offers 57 degrees of horizontal and 43 degrees of vertical field of view, operating in the range of 1 to 3.5 meters. The device is equipped with an infrared emitter, an RGB color sensor, an infrared depth sensor, a tilt motor mounted in the base and four microphone arrays that are spaced along the entire width of Kinect.

Kinect supports a maximum speed of 30 frames per second at 320x240 (16-bit) and 640x480 (32-bit). The Kinect sensor that is compatible with every XBOX 360 console is available in SQM Rental House right away!
