PRODUCT DESCRIPTION

The Galaxy Tab 4 LTE is a Samsung tablet that is equipped with a 10.1" touch screen with TFT panel and WXGA (1280x800) resolution. The Tab 4 LTE version offers a MicroSIM (3FF) card input.

White Samsung Galaxy Tab 4 LTE has two cameras. The front camera with a resolution of 1.3Mpx records videos in VGA resolution, while the rear camera, with a resolution of 3Mpx, takes pictures in 2048x1536 resolution and records videos in HD resolution. The tablet is also equipped with a MicroUSB input, a minijack for headphones and a slot for an additional MicroSD memory card.

The SideSync function allows you to easily sync the Galaxy Tab 4 tablet with other Samsung smartphones. Thanks to this, it is possible to perform the same operation on two devices. The tablet is also great for traveling, in the form of GPS navigation.

The device offered by the SQM Multimedia Support will fit all necessary documents thanks to 16 gigabytes of internal memory, which can be further enlarged by an external microSD card. The lithium-ion battery with a capacity of 6800mAh allows for continuous, intensive use of the device - even for 10 hours.

1.5GB of RAM and an efficient Qualcomm Snapdragon 400 quad-core processor with Qualcomm Adreno 305 graphics are responsible for the smooth operation of all functions and applications. The compact size and lightweight of Samsung Galaxy Tab 4 allow you to take and use the tablet in any place.
