

The One-Click Meeting Experience for Skype™ for Business

ClickShare and Logitech® SmartDock

logitech

Meetings are where decisions are made and consensus created. Participants need to effectively discuss, share and present, both in the conference room and from remote locations. Businesses need the right meeting room technology to enable efficient collaboration –equipment that’s extremely easy to use and no hassle to maintain.

The Logitech SmartDock is a secure A/V control console designed for Skype Room Systems. It lets users join a video or audio call with only one touch. ClickShare is Barco’s wireless presentation system, allowing users to share content, with only one click.

Together ClickShare and SmartDock combine for first class meeting collaboration that delivers a stress-free user experience in an integrated Skype for Business environment. Simply plug in and add the wireless presentation capabilities of ClickShare to a SmartDock and provide a truly seamless meeting experience.

One touch to join the meeting and one click to share your screen.

BARCO

Benefits

ClickShare

- One-click wireless sharing solution, for multiple users
- Share instantly - from laptop or mobile device, using a ClickShare Button, the ClickShare app or Airplay
- No training, no installation, no messy cables

SmartDock and Skype Room Systems

- One-touch operation to launch or join a Skype Room System meeting
- Familiar Skype for Business user interface
- Works with existing Certified for Skype for Business displays and conference systems

A winning combination

- Wireless collaboration, keeps tables cable-free
- Plug-in out of the box integration, and minimal IT support
- Stress-free meetings, for participants in or outside the room

ClickShare CSE-200

Any ClickShare base unit can be used with the Logitech SmartDock. For the best user experience, we recommend the CSE-200 model, with its enhanced security features and central management. Two users can share on screen at the same time in full HD.

- Enhanced security
- HDMI (Full HD) output
- Two Buttons included
- Up to 16 users connected
- AirPlay, Google Cast, iOS app, Android app, MirrorOp
- Up to 5 years warranty

How it works

Set up your Logitech SmartDock with Microsoft Surface Pro and Skype Room System Software. Next simply connect the HDMI output of your ClickShare base unit into the HDMI input of your SmartDock to provide instant wireless collaboration. No additional cables or connections are required.

Logitech SmartDock

A secure A/V control console designed for Skype Room Systems that integrates seamlessly with existing Certified Skype for Business displays and video cameras.

- Certified by Microsoft
- Two HDMI output supporting up to 1080p60
- One Gigabit Ethernet port
- Three USB 3.1 ports
- Motion sensor / presence detection with 3 meter range
- Headset jack
- Kensington security slot
- Optional Extender Box

One-touch, one-click solution

Boost remote & local collaboration

Increase productivity in every meeting space

Effortless collaboration for everyone

Meetings large and small can benefit from wireless collaboration with ClickShare and Logitech SmartDock for Skype Room Systems.

Connect everyone with Skype for Business. Meeting rooms become a place of seamless collaboration, with remote participants, user-friendly technology, one-touch meetings, one-click wireless sharing.
